

Official Sailmaking Partner

North Sails, a leading provider of innovative sail technology, combines decades of experience with cutting-edge materials to deliver unparalleled performance on the water. From cruising sails to racing solutions, we meet all sailing needs. Solaris Yachts has relied on us to provide its Owners with sails of unparalleled quality, durability and craftsmanship.

North Sails offers Solaris Yachts Owners *3Dⁱ* sails, a revolution in sailmaking, as it produces high-performance, reliable sails. With 3Di technology, improved performance no longer comes at the expense of longevity. This technology is innovative because of three components: the use of coated filament tapes, a sail shape set on a full-size 3D mold, and, most significantly, the elimination of Mylar film.

North Sails also offers Solaris Yachts Owners *NPL^L TOUR*, a sailcloth for sails excellence for panel cruising sails. Sails cut from NPL TOUR are highly resistant to chafe, fatigue and UV. If you are considering options for panel cruising sails, ask us about NPL TOUR.

Great Sails for Great Boats
